

LASENE

Neural Therapeutic Breakthrough

Safe and effective Laser PBM Program for restoring over 200 neural deficits that impact your patients functional neurology, activities, happiness, and Quality of Life!

● Neural Deficits ● Functional Deficit Description ● Mean Peak Improvement | Patient Count

Executive Function 71% / 42 ct. Focus, planning, word search, faces, language, memory, conversations, memory, discrimination, social restraint.	Word Search/Processing 54% / 26 ct. Find the words for speaking or writing	Chronic Pain 40% / 13 ct. Overall whole-body, chronic and high-intensity chronic pain	Posture 55% / 20 ct. Postural collapse, fatigue, weakness
Sleep 70% / 39 ct. REM, Non REM, Excessive Daytime Sleep, difficulty going/staying asleep, waking more than 1xper night, poor dream recall...	Sexual Interest/Activity 73% / 19 ct. Interest and activity	Digestion 80% / 14 ct. Bloating, inflammation, discomfort, indigestion, constipation	Balance 50% / 19 ct. Non-vertigo, balance dysfunction
Memory 29% 27 ct. Short Term memory and Long Term memory recall	Mood Changes 30% / 14 ct. Depression, rage, sadness ...	Movement Dysfunction 75% / 15 ct. General weakness, slow cadence, stiffness, slow speech	Gait 74% / 21 ct. Gait dysfunction, freeze, stiffness
Sense of Smell 55% / 16 ct. Sense of smell	Anxiety 42% / 8 ct. Anxiety	Tremors 80% / 16 ct. Intentional and resting tremors	Coordination 75% / 13 ct. Fine motor coordination

- Treat neurological and physical deficits found in:
 - Chronic Pain
 - Sleep Dysfunction
 - Memory loss / Cognitive Decline
 - TBI / Parkinson's
 - Similar Conditions
 - Multiple Complaints
- We train your staff to treat the toughest of neural deficits - **Ask how!**

Treating the Impossible!

The following PD stories are a sampling of Lasene effectiveness out of numerous neural deficit profiles. You may request HIPAA Compliant data on these and similar cases.

Before Lasene for a Doctor of Chiropractic

Advanced Parkinson's in 2015. Shuffling gate, severe forward posture, muscle rigidity, loss of voice projection and volume, tongue and mouth tremors, whole body tremors, right hand severe tremors, constipation, insomnia, nightmares, low energy, decreased libido, erectile dysfunction, and brain fog."

After Lasene

Lasene and light changes began to surface during the first 30 days. Now I have normal gate and posture, no mouth tremors, no body shaking, only a slight right-hand tremor that occurs a couple of times a day, restored sleep, no nightmares, normal bowel movements, restored libido and sexual function, voice projection restored, no more brain fog." Dr. D **Reported 97% gain in 49 deficits / 40 in remission at 14 months (+/- 15%). Observed 80% gain at 15 months (+/- 5%).**

Restoring Lives!

Patrick Morrissey

Early onset Parkinson's disease: Was worsening rapidly and like many, felt hijacked by a condition that impacts so many other aspects of your life. After 1.5 years of Lasene Neural Therapeutics, he has recovered an astounding 41% mean peak improvement in 34 combined deficits with 15 improved by 50-60%. This is a breakthrough in neural therapeutics and opens up a fascinating future for Mr. Morrissey and so many others that suffer from losses in functional neurology.

Parkinson's Can Too!

Patrick was recently selected as the only PD athlete to row 2,800 miles in the June, 2024 "World's Toughest Row" from California to Hawaii. This is one of the most challenging physical endeavors one can imagine to raise \$2m for the Michael J. Fox Foundation Find a Cure Program.
